

## MEMORY CARD WITH A MODULAR COMPONENT

### Abstract of the Disclosure

A memory card comprising a first modular component that comprises a first host interface and a first host interface module and a device interface module configured to operate a device interface that is coupled to a storage device. The first host interface module is configured to call a function in the device interface module. The first modular component is replaceable with a second modular component that comprises a second host interface and a second host interface module, and the second host interface module is configured to call the function in the device interface module.
